

**AMENDMENTS TO THE ABSTRACT:**

Please amend page 10, paragraph 2, to read as follows:

**- - ABSTRACT OF THE DISCLOSURE - -**

[**Abstract:**   ] An endoscopic surgery device for the insertion and recovery of a haemostatic plug [(8)] at the surgical site[,]. The device compris[ing]es a tubular body [(1),] suitable for slidingly housing the plug [(8)], and a plunger [(4)] slidingly engageable within the tubular body [(1)] so as to push the plug outside thereof, and to place it in[to] the surgical site. The plug is connected to a locat[ion]or [means (10)] being of a suitable colo[u]r, radio-opaque and floating [in relation] relative to the internal organs, blood or other [liquids] fluids present at the surgical site. At [the] a distal end [(4a)] of the plunger [(4) means (5) are], a handle is provided for gripping the locat[ion] or [means to] for recovering the plug after use and retracting [it] the plunger within the tubular body.
